Race of Defendants Executed

Race of Victim in Death Penalty Cases

About 80% of the murder victims in cases resulting in an execution were white, even though nationally only 50% of murder victims generally are white.

Recent Studies on Race

- In 96% of the states where there have been reviews of race and the death penalty, there was a pattern of either race-of-victim or race-of-defendant discrimination, or both. (Prof. David Baldus report to the ABA, 1998).
- 98% of the chief district attorneys in death penalty states are white; only 1% are black. (Prof. Jeffrey Pokorak, Cornell Law Review, 1998).
- A comprehensive study of the death penalty in North Carolina found that the odds of receiving a death sentence rose by 3.5 times among those defendants whose victims were white. (Prof. Jack Boger and Dr. Isaac Unah, University of North Carolina, 2001).
- A study in California found that those who killed whites were over 3 times more likely to be sentenced to death than those who killed blacks and over 4 times more likely than those who killed Latinos. (Pierce & Radelet, Santa Clara Law Review 2005).

Persons Executed for Interracial Murders

Innocence

Since 1973, over 130 people have been released from death row with evidence of their innocence. (Staff Report, House Judiciary Subcommittee on Civil & Constitutional Rights, Oct. 1993, with updates from DPIC).

From 1973-1999, there was an average of 3.1 exonerations per year. From 2000-2007, there has been an average of 5 exonerations per year.

*Federal executions are listed in the region in which the crime was committed.

DEATH SENTENCING

The number of death sentences per year has dropped dramatically since 1999.

Year	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008

JUVENILES

• In 2005, the Supreme Court in *Roper v. Simmons* struck down the death penalty for juveniles. 22 defendants had been executed for crimes committed as juveniles since 1976.

MENTAL HEALTH ISSUES

• *Mental Retardation*: In 2002, the Supreme Court held in *Atkins v. Virginia* that it is unconstitutional to execute defendants with mental retardation.

• *Mental Illness*: The American Psychiatric Association, the American Psychological Association, the National Alliance for the Mentally Ill, and the American Bar Association have endorsed resolutions calling for an exemption of the severely mentally ill.

WOMEN

• There were 53 women on death row as of June 30, 2009. This constitutes 1.6% of the total death row population. 11 women have been executed since 1976. "Death Penalty For Female Offenders" by Victor L. Streib, (June 30, 2009)

DETERRENCE

- According to a survey of the former and present presidents of the country's top academic criminological societies, **88% of these experts rejected the notion that the death penalty acts as a deterrent to murder.** (Radelet & Lacock, 2009)
- Consistent with previous years, the 2008 FBI Uniform Crime Report showed that **the South had the highest murder rate. The South accounts for over 80% of executions.** The Northeast, which has less than 1% of all executions, again had the lowest murder rate.

EXECUTIONS SINCE 1976 BY METHOD USED

1010	Lethal Injection	36 states plus the US government use lethal injection as their primary method. Some states utilizing lethal injection have other methods available as backups. Though New Mexico abolished the death penalty in 2009, the act was not retroactive, leaving two prisoners on death row and its lethal injection protocol intact.

FINANCIAL FACTS ABOUT THE DEATH PENALTY

- The California death penalty system costs taxpayers \$114 million per year beyond the costs of keeping convicts locked up for life. Taxpayers have paid more than \$250 million for each of the state's executions. (L.A. Times, March 6, 2005)
- In Kansas, the costs of capital cases are 70% more expensive than comparable non-capital cases, including the costs of incarceration. (Kansas Performance Audit Report, December 2003).
- In Maryland, an average death penalty case resulting in a death sentence costs approximately \$3 million. The eventual costs to Maryland taxpayers for cases pursued 1978-1999 will be \$186 million. Five executions have resulted. (Urban Institute 2008).
- The most comprehensive study in the country found that the death penalty costs North Carolina \$2.16 million per execution *over* the costs of sentencing murderers to life imprisonment. The majority of those costs occur at the trial level. (Duke University, May 1993).
- Enforcing the death penalty costs Florida \$51 million a year above what it would cost to punish all first-degree murderers with life in prison without parole. Based on the 44 executions Florida had carried out since 1976, that amounts to a cost of \$24 million for each execution. (Palm Beach Post, January 4, 2000).
- In Texas, a death penalty case costs an average of \$2.3 million, about three times the cost of imprisoning someone in a single cell at the highest security level for 40 years. (Dallas Morning News, March 8, 1992).

PUBLIC OPINION

- The May 2006 Gallup Poll found that overall support of the death penalty was 65% (down from 80% in 1994). The same poll revealed that when respondents are given the choice of life without parole as an alternate sentencing option, more choose life without parole (48%) than the death penalty (47%).
- A 2009 poll commissioned by DPIC found police chiefs ranked the death penalty **last** among ways to reduce violent crime. The police chiefs also considered the death penalty the **least efficient** use of taxpayers' money.
